

Digital Info Security Company (DISC) specializes in cost-effective hosted IT solutions for compliance. Our world-class data center allows us to provide the highest level of security and redundancy for our services.

Email and Instant Messaging Compliance

PolicyBridge™ Email Archiving & Compliance

Archiving & Indexing for Compliance

- Uses WORM class media to archive messages in an unalterable state in our secure data center
- Allow users to easily search, review and retrieve messages through a streamlined web interface
- Helps organizations in the financial, accounting, medical and other industries comply with laws and regulations concerning electronic communications, including SOX, HIPAA, SEC Rules 17a-3 & 17a-4, GLBA, and FRCP
- Is offered as a fully hosted solution, a journal edition, or a hardware/software in-house solution
- The fully hosted MS Exchange solution includes spam filtering and virus protection

Surveillance & Active Policy Enforcement

- Actively scans email messages for sensitive, confidential or proprietary information
- Flags messages for review or enforces policies to block, quarantine, log or encrypt them

Instant Messaging Compliance & Archiving

- Monitors a majority of instant messaging platforms, including Bloomberg messaging
- Flags messages that violate lexicon policies
- Archives messages in WORM media
- Searches and downloads IM conversations

Encryption Solutions

PolicyBridge™ Email Encryption

An automatic email encryption and archiving solution for the medical industry, governmental organizations and other industries requiring secure communications.

- Automatically encrypts messages containing sensitive information as identified by a lexicon
- Eliminates human error and prevents data leaks
- Features archiving and search capabilities

Email Plug-in

An easy to use encryption plug-in for the secure transmission of email messages and attachments from desktop-to-desktop.

- Requires no special training
- Features digital rights management
- Works with multiple email clients

USB Flash and Removable Drives (GSA & DAR BPS Schedule Approved)

Featuring automatic detection and encryption/decryption of the contents/files/folders written to all removable media devices.

Secure Vault Manager

Hosted solution for the management of password recovery and dynamic remote revocation for encrypted data security devices.

Data Backup and Storage

RestoreRex® Online Data Backup & Restore

- Economically backs up designated files, folders, databases and servers to our secure data center
- Files can be retrieved 24/7 using the backup software or from any location with Internet connection via the RestoreRex web interface
- Backups run automatically on a custom schedule

GroupStorage Online File Sharing & Storage

Provides secure access to your files from anywhere, anytime. GroupStorage allows users to collaborate on files, ensures that users have the most current version, and eliminates emailing large attachments.

Other Hosted Services

Website Hosting: Reliable, secure, high speed web hosting service. We offer both Windows-based and Linux-based solutions.

BlackBerry / iPhone / Trio Hosting: Features a remote lock & delete capability whereby all data can be immediately deleted if your device is lost or stolen and uploaded to a new device.

Secondary (Failover) MX Service: Continue to receive emails if your server goes down. Messages are filtered for spam and protected against viruses.

Data Center

DISC's data center is equipped with multi GB broadband transport options, raised floor cooling, a FM-200 fire suppression system, multiple communication lines, and redundant/backup power systems.
